

Leveraging AI Quiz - Introduction to Computer Programming

Below is a scored review of your assessment. All questions are shown.

Correct Answer

Partially Correct

Incorrect Answer

1 Which keyword is used to declare a variable in JavaScript that should not be reassigned?

Your Answer `const`

Correct Answer `const`

Justification

The `const` keyword is used to declare a variable that should not be reassigned.

2 JavaScript arrays are:

Your Answer Zero-indexed

Correct Answer Zero-indexed

Justification

JavaScript arrays are zero-indexed, meaning the first element is at index 0, the second element is at index 1, and so on.

3 JavaScript is used for:

Your Answer Creating dynamic web pages

Correct Answer Creating dynamic web pages

Justification

JavaScript is used to add interactivity and responsiveness to web pages.

4 Which operator is used for concatenating strings in JavaScript?

Your Answer +

Correct Answer +

Justification

The + operator is used for string concatenation in JavaScript.

5 JSON (JavaScript Object Notation) is primarily used for:

Your Answer Representing and transmitting data

Correct Answer Representing and transmitting data

Justification

JSON is widely used for data interchange between systems as it provides a lightweight and human-readable format for representing and transmitting data.

6 What does the break statement do in JavaScript?

Your Answer Exits a loop prematurely

Correct Answer Exits a loop prematurely

Justification

The break statement is used to exit a loop prematurely before the loop condition is met.

7 Which property returns the number of characters in a JavaScript string?

Your Answer .length

Correct Answer .length

Justification

The .length property returns the number of characters in a JavaScript string.

8 Ternary operator in JavaScript takes how many operands?

Your Answer 3

Correct Answer 3

Justification

The ternary operator takes three operands: a condition, an expression to execute if the condition is true, and an expression to execute if the condition is false.

9 Which building block of the World Wide Web is responsible for storing and delivering web content?

Your Answer Servers

Correct Answer Servers

Justification

Servers store and deliver web content to clients (browsers).

10 Which programming paradigm focuses on using functions to solve problems?

Your Answer Functional programming

Correct Answer Functional programming

Justification

Functional programming emphasizes using functions to solve problems and treats functions as first-class citizens.
